COLBY KAUK
Software Engineer

LinkedIn | Github | colby.kauk@gmail.com

PROFILE

Dedicated full-stack developer proficient in Python, Java, React, mySQL, and mongoDB. Gritty and diligent engineer focused on growth, with a willingness to learn and a curiosity to gain a deeper understanding of coding. Skilled problem solver able to self-manage during independent projects and collaborate in a team setting.

TECHNICAL SKILLS

Languages: [HTML, CSS, JavaScript, Python, Java, React.js, SQL] **Frameworks/Libraries:** [React, Express, Mongoose, Bootstrap] **Databases:** [MongoDB, MySQL] **Tools:** [GIT, Spring Tools Suite, VS Code, Outsystems Low Code Platform, Postman]

TECHNICAL PROJECTS

-**NETFLIX CLONE** | **Github**

Built a full-stack Netflix clone using MERN (MongoDB, Express, React and NodeJS).

- → Used technologies such as Redux Toolkit to configure a store, Firebase for authorization, Axios to fetch data, and Styled Components for CSS.
- → Added features such as login and registration, a video player with picture-in-picture mode, a sideways slider, filtering by genre, and adding movies to a user's liked page.

-**Outsystems Movie Database** | **Outsystems**

Built a full-stack CRUD movie database using Outsystems IDE that detailed relationships between cast and crew, production talent, and movies

- → Constructed a client-side application with List and Detail screens, security and authorization, pagination, sorting, form validations, and ratings.
- → Built a backend using SQL databases with data modeling, including many-to-many entity relationships.
- → Used Action Flows to define the logic that runs both the server and client side.

EDUCATION

-**Coding Dojo**, Full-Stack Developer Certificate, Remote   **March, 2022**

- → An immersive 4-month full-stack web development bootcamp that specializes in Python, Java, MERN (MongoDB, Express, React, Node.js)
- → Spent 1000+ hours on intensive coursework through all phases of project development of full-stack application including building, testing, debugging, and deploying.
- → Worked and collaborated 100% remotely, full-stack CRUD application built in 5 hours or less.

-**Outsystems Reactive Developer Bootcamp**, Associate Reactive Developer Certificate, Remote   **Oct, 2022**

- → A two-week development course focused on building a full-stack reactive web app using Outsystems low-code environment.

-**University of California Davis**, Davis California   **June, 2005**

- → Bachelor of Arts in International Relations
